

# Ecoustic® Timbre Point Trimming Guidelines

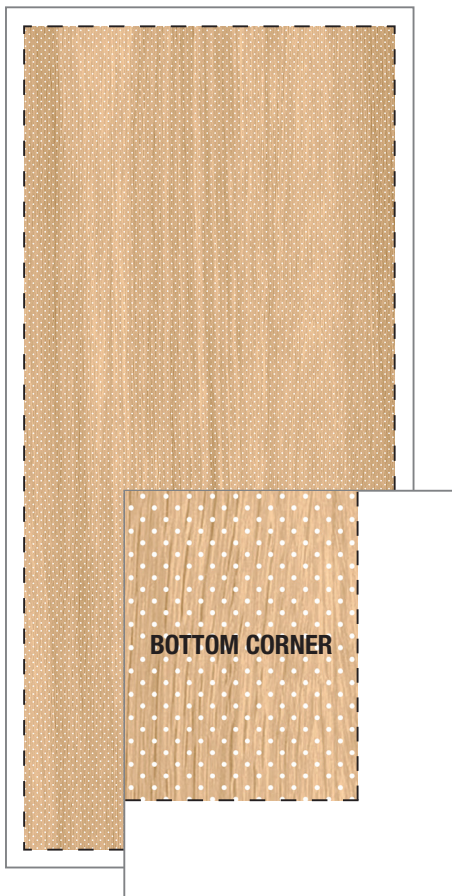

- The Timbre Point print does not extend to the edges of the panel.
- An unprinted border occurs on all four sides.
- The panels need to be trimmed before installation even when using edging profiles.
- Make all measurements and cuts based on the printed area. Do not measure from the panel edge.

Please adhere to the following guidelines for trimming:-

- Measure within the printed area and using a straight edge cut horizontally and vertically to the size required.
- Refer maximum dimensions below.
- Ensure all cuts capture the printed area.
- The print is designed to simulate the natural grain variations of timber.
- Panelling will occur when joined.

Timbre Point is digitally printed. Batch to batch variation can occur.

## Panel

9mm Panel Size:	1220 x 2440mm / 4' x 8'
Print Size:	1200 x 2400mm (min.) / 3'11" x 7'10"
12mm Panel Size:	1220 x 2800mm / 4' x 9'2"
Print Size:	1200 x 2700mm (min.) / 3'11" x 8'10"
24mm Panel Size:	1250 x 2750mm / 4'1" x 8'11"
Print Size:	1200 x 2700mm (min.) / 3'11" x 8'10"
